

Iris Collection

Minimalism and craft are unified through Iris's simple planar materials and angular composition. Available in side and coffee table styles, Iris is optimized for easy power integration to support in-situ work.

Product Story

Iris strives to convey simplicity through a singular focus on planar materials and forms. Conceived as a composition of geometrically intertwined planes, Iris elevates sheet materials into a crafted sculptural expression. Authored by Memo's Creative Director - Dave Simon, Iris fuses the practical considerations of the commercial workplace with a minimalist approach to materials and structure.

Designer Story

Dave Simon is Memo's Creative Director and co-founder. Dave believes good design starts with a problem, and ends with an expression that combines the needs of the the human with the constraints of manufacturing eco-system. At Memo, Dave has thoughtfully curated an ensemble of designs that inspire users and enhance the built environment. Iris follows this playbook, with its practical use of materials, essential consideration for power, and unique formal expression.

Spacious Interior

The unique geometry of the Iris base intentionally allows for a spacious open cavity, accommodating power modules, power cords, and/or placement over power outlets.

Nesting Ensemble

Offered in two heights, Iris tables are scaled to nest and overlap, creating tiered surfaces for varied functionality and cohesive groupings.

Dual Finishes

Iris supports singular or two-tone material specifications, offering tops in both Veneer and Forbo Linoleum.

Customs Friendly

Iris's panel-based structure allows for the accommodation of alternative sheet materials, such as solid surface and recycled composites.
